

Pre-K Summer Reading List (2024-2025)

Reading to young children is an important way to help them build language skills. It exposes them to new words and ways of using language. It also helps them learn general information about the world, which makes it easier for them to learn about new subjects once they get to school. Spending time together while reading aloud also helps to create strong parent-child bonds and promotes healthy brain development. Children that are read to more often have improved language and listening skills, experience stronger emotional connections to their loved ones, and gain a lifelong love of reading!
